UX DESIGNER

UX and Strategy Designer who treats every screen as part of a bigger system. I design experiences that don't just look good — they move **business metrics**, **fix broken workflows**, and turn **friction into flow**. Equal parts **researcher, strategist, and systems thinker**, I bridge the gap between user needs and business goals, using design as a lever for growth and operational clarity. An Enthusiast who is always adaptable and ought to endlessly learn new things. I don't just design interfaces — **I design outcomes**.

EDUCATION

St. Josephs Co- Ed school Commerce + Computer science, Attended till class 12th	Bhopal, Madhya Pradesh, India 2008 – 2020
Jagran Lakecity University Bachelor of Design in UXUI- Specilization in Business and Strategy Design	Bhopal, Madhya Pradesh, India Sept 2020 – Nov 2024

SKILLS

Business&Strategy Design	Business Strategy & Operating Model Design, UXStrategy & Roadmapping, Design Thinking & Service Design, Systems Thinking & Process Optimization, Stakeholder Alignment & Cross-functional Facilitation, Value Proposition Design, OKR & KPI Framework Development
UserExperience Design	User Research (Qualitative & Quantitative), Journey Mapping & Service Blueprinting, Information Architecture, Interaction Design & Wireframing, Usability Testing & Heuristic Evaluation, Design Systems & Component Libraries, Prototyping (Low-fi to High-fi), Accessibility & Inclusive Design (WCAG)
Growth&Product Design	Growth-Driven Design (GDD), Conversion Rate Optimization (CRO), A/B & Multivariate Testing, Funnel Analysis & Optimization, Data-Informed Design Decisions, Behavioral Design & Nudge Theory, Retention & Engagement Design, Onboarding Flow Optimization
Systems & Operations	Workflow & Operational System Design, Cross-platform Experience Design, Design Ops & Process Documentation, Change Management for Digital Transformation, Tech-Business Translation

TECHNICAL SKILLS

Design Tools	: Figma, Framer, Spline, Adobe Design Tools
Languages	: Basics of HTML, CSS, JS, REACT, SQL, Python (Basics of these languages and ability to understand them)
DataManagement and Workflow Tools	Miro, Jira, Google analytics, Notion, Maze, User Testing
AI Tools	: Claude, ChatGpt, Gemini, Deepseek, Work with API's for AI Models

EXPERIENCE

Sales and Operations Associate & Researcher [Brand Ventor Pvt. Ltd.]	[November 2023] – [March 2024] [Bhopal, Madhya Pradesh, India]
- Conducted user research (interviews, surveys, contextual inquiry, usability testing) to uncover friction in sales and operational workflows - Applied Qualitative and Quantitative Research, and various methodologies and research models like SCRUM, AGILE, WATERFALL etc. for project and workflow management and journey mapping to identify pipeline bottlenecks, cutting turnaround time by [15%] - Designed and documented standard workflows, improving consistency and reducing manual errors - Used analytics and CRM data to prioritize high-impact operational fixes aligned with business goals - Facilitated stakeholder workshops to validate research and drive process decisions	

Interaction Designer
[SRI SAI STUDIOS]

[May 2024] – [January 2025]
[Bhopal, Madhya Pradesh, India]

- Designed **user-centered interaction flows** and wireframes, turning complex needs into simple, scalable interfaces
- Built interactive **Figma prototypes** to validate concepts early and reduce development rework
- Ran **usability tests** and iterated on designs, improving task completion and interface clarity
- Collaborated with product and engineering teams, maintaining consistency via a shared **design system**
- Restructured **information architecture** to improve navigation and reduce user drop-off

UI Designer and Developer
[Total Project Solutions]

[January 2025] – [August 2025]
[Indore, Madhya Pradesh, India]

- Designed and built **responsive UIs** using HTML, CSS, JS, and React, using **AI tools** to speed up development
- Converted high-fidelity **Figma designs** into pixel-accurate, functional front-end code
- Used **AI-assisted coding** to prototype, debug, and optimize components, cutting dev time by **[25 to 30%]**
- Built **accessible, cross-browser interfaces** following WCAG guidelines
- Maintained design-dev consistency through **reusable components** and design tokens

Senior UI/UX Designer
[Mushroom World Group Pvt. Ltd.]

[November 2025] – [present]
[Bhopal, Madhya Pradesh, India]

- Led end-to-end **UX strategy** – research, journey mapping, design, testing – shaping product roadmaps
- Ran research (interviews, surveys, **A/B testing**, analytics) to uncover growth opportunities
- Owned the **design system**, ensuring scalability across multiple product lines and teams
- Mentored designers and led **design thinking workshops** to build a research-driven culture
- Aligned UX strategy with **business KPIs/OKRs**, driving gains in engagement and conversion
- Stakeholder management, Business strategy design, decision making in major projects of the Organisation such as Algae Tree, Canact, 3D Model holograms

PROJECTS

Project 1 - CANACT

- * Designed a clean and modern looking application called CANACT
- * Main purpose of the app is to let people in a close vicinity connect with themselves essentially serving a purpose what humans does in a society
- * App is designed in figma along with knowledge graph of the application
- * Designed user flow, architecture of the app along with defining its GTM, TAM, SAM, SOM for better launch phase

Project 2 - Meridian - Fintech

- * Meridian- A Fintech application which is not a common everyday application.
- * The main purpose of the Application is not just to keep track of money, it is to let the user manage and use his money better.
- * The Application is designed in figma and further planning and research for development is underway.

Project 3 - LogiFlow - Logistics Dashboard

- * Built an enterprise-grade, India-focused AI Logistics Management System spanning 20+ operational modules, from shipment tracking and fleet operations to GST billing, compliance, and warehouse workflows.
- * Designed polished real-time fleet monitoring with interactive GPS maps, selectable vehicle markers, and live shipment-to-vehicle context.

- * Created responsive vehicle detail experiences featuring status-aware illustrations, load weight, driver, speed, and location intelligence.
- * Delivered a clean, scalable SaaS dashboard designed using Figma and developed using Next.js, React, TypeScript, Tailwind CSS, and shadcn/ui components for high-volume logistics operations.

Project 4 - Teamio - HRMS Platform

- * Built a polished HR dashboard, with a precise, cohesive design system across every workflow. Implemented secure Login and Registration experiences with password-policy feedback and intuitive account flows.
- * Developed employee directory, profile details, attendance, leave, payroll, audit logs, company settings, and user account management screens.
- * Delivered a streamlined, billing-free HR platform focused on clarity, usability, and enterprise-ready visual consistency.

Project 5 - NorthStar- Operations Track and Record dashboard

- * Built an enterprise-grade Business Intelligence and Financial Planning Command Centre for real-time executive decision-making.
- * Designed interactive financial dashboards covering revenue, costs, profitability, cash flow, growth, unit economics, and department efficiency.
- * Implemented live calculators for cost analysis, CAC/LTV, break-even, pricing, payroll, and runway forecasting.
- * Created responsive, premium UI workflows with glassmorphism, KPI comparisons, drill-down views, search, and data-recording capabilities.
